PROBLEM STATEMENT

Farmers still decide on guesswork - there is no single smart, accessible tool for crop decisions.

Generic Advice

Crop and fertilizer tips ignore soil type, climate and nutrient levels, so yields stay below potential.

Late Disease Detection

Manual inspection is slow. Diseases spread and cause heavy crop loss before action is taken.

Unreliable Yield Forecasts

Without accurate prediction, farmers cannot plan resources, crop cycles or market sales.

Rural Access Gap

Remote farmers lack modern tools, expert advice and timely, language-friendly insights.

Result: lower yields, wasted inputs and avoidable losses for farmers.

PROPOSED SOLUTION

One AI platform: soil data or a leaf photo in, clear decisions out.

99.3%	98.7%	97.82%	0.9793
Crop Recommendation	**Fertilizer Advice**	**Disease Detection**	**Yield Prediction (R^2)**
Random Forest	Random Forest	CNN, 38 classes	Gradient Boosting

Farmer signs up (admin verified) → **Enters soil data / uploads leaf photo** → **AI models analyse** → **Crop, fertilizer, cure, yield + report**

6 Languages
Hindi, Tamil, Telugu, Punjabi, Kannada, English

Auto Reports
Profit and revenue per acre, downloadable

AI Chatbot
24/7 farming help in simple language

Supplement Store
Cures and fertilizers with buy links

TECH STACK

STACK

Frontend	HTML5, CSS3, JavaScript (responsive, multilingual)
Backend	Python, Flask REST API, SQLAlchemy, MySQL
AI / ML	Scikit-learn (RF, GBR), TensorFlow/Keras (CNN), OpenCV, NLP chatbot
Data & Tools	Kaggle datasets (PlantVillage), Colab, Git/GitHub, VS Code

BUSINESS PLAN

Target Users

- Small and marginal farmers
- Farmer groups and agri-cooperatives
- Agri institutions and NGOs

Revenue Streams

- Commission on supplement and fertilizer sales
- Premium reports and financial insights
- Licensing to institutions and NGOs

Go-to-Market

- Pilot with local farmers
- Partner with agri institutions
- Hindi-first, mobile-friendly rollout

Growth Roadmap

- Mobile app with offline mode
- IoT sensors and live market prices
- More crops, diseases and languages

Farmers save on wasted inputs and losses; we earn when they buy and subscribe.

THANK YOU
